P-010 Photo Upload Functionality

👁 💬 1   RJ

Create Logo and Name

                                  AS

Automatically assign a user to a shelter_id based on their email domain name, instead of allowing

the user to manually choose their
own shelter_id

👁 ☰ 💬 1   MS

Why do we have package-lock.json
and package.json in the root of VS
Code, this should be in frontend
only?

👁 💬 1   RJ

Unit Test - BE

Observation 1 - Failed to fetch?

👁 ☰ 💬 1 📎 2   RJ

Observation 2 - Navbar and no
screen

👁 ☰ 💬 2   MW

Form validation - text length

AG

Observation 8 - If the end user is logged in, hide the LOG IN Button

💬 1   MW

Add some pytests for the backend

Aug 22   RJ

Demo Day

Demo - Record presentation for playback

Aug 22   SD

Demo - Slide deck production

MS

Further work and collaboration (post Makers)?

RJ

Record and add video to our portfolios

RJ

Done

Observation 4 - Follow Github
Readme convention

1　👁　≡　　　　　　　　RJ

Observation 9 - Add a CREATE
ANIMAL button on the Navbar for
someone who is logged in.

AS

Tests for Sign up Page

SD

Observation 7 - Add more Seed
data for the demo

1　👁　　Aug 21　≡　💬 1　RJ

Observation 6 -Add a status field to
the Animal record in the database

1　👁　　Aug 21　≡　💬 2　RJ

Create an add-animal button on the
navbar

👁　　Aug 20　💬 1　　　AS

Two views of the navbar - logged in
or out

Ensure proper handling of .env files using Python Dotenv

1   👁   🕐 Aug 20   ☰   RJ

Fix the Seed file with some pre-registered 'hash passwords'

👁   🕐 Aug 19   💬 1   RJ   MW

P-016 - Create Logout component

👁   ☰   💬 1   ☑ 0/1   MW

Add picture to Animal advert page

👁   ☰   💬 2   AG   AS

P-004 - Animal Adverts

1   👁   ☰   💬 2   ☑ 6/7   MS

P-014- NAV bar/ Link pages together to bring app 'together'

👁   ☰   💬 4   AS

Add picture of individual animal to Animal Advert Page

MS

Define 'handleEditClick' on animal advert page to create text field form

MS

Minor changes to Schema

P-001 - Create Login page

Integrating PUT request/edit mode to React Frontend form

P-015 - Change Animal Advert form so that user only has pre-defined options for species e.g. just 'cat', 'dog', 'rabbit'

Modify 'getallAnimals' backend function so that only animals with 'active' = True are returned

Modify 'delete' button to 'remove listing' and change 'active' property to False

Define 'handleRemoveClick' on animal advert page to set 'active' status to False

P-005 Signup page for Shelter

Need to create backend Flask route that allows for EDITING the animal information/PUT.

P017 - Extract info from JWT token and add expiry

Hash user passwords - BE

P-012 Modify API and React component so that information about shelter is also returned when displaying a single animal

P-013 Modify shelter email component on Animal Profile Page using 'mailto'

P-002 - Set up pet listing pages

Make /animals the first page that the end user sees.

Scrum principles?

Deliver MVP to Steve at 1030

Set up Python API route in Flask to handle form data and return successfully signed up message - BE

P-006 Create Advert

Hide/mask password characters when typing into the login page

Secret Key required

P-003 - Initial Seed data for Postgres

PostgresDB Schema
